Cross-references

Use of the Cross-references

The following notes will help you to understand the references:

1. The references are from chapters in Genesis.
2. The chapter references are split up into verses rather like a normal Bible.
3. The words in *italics* are the word or start of the phrase for which the references following are given.
4. Where there is no word in *italics*, the references are from the whole verse.
5. Where no book of the Bible is mentioned at the start of a group of verses, it is Genesis. Otherwise it is the previous book mentioned.
6. Where no chapter is mentioned, it is the same chapter that the reference is from.
7. Colons (:) between numbers indicate chapter and verse, eg 2:1 means chapter 2 verse 1
8. Commas (,) between numbers indicate verses from the same chapter, eg 2:1,2,5 means chapter 2 verses 1, 2 and 5.
9. The references are based on the *Authorised Version* of the Bible. The exact words may not occur in more modern translations. *The New King James Version* will be the easiest of the modern versions to use with these references.
10. The abbreviations used for the books of the Bible are as follows:
